**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art fails to disclose or make obvious a superconducting nano-channel consisting of a superconducting nano-tube having a bend.

Claims 2-9 are allowed by virtue of their dependency on claim 1.

With respect to the independent claim 10, the prior art fails to disclose or make obvious a nano-channel formed on a substrate between edges of two area of superconducting material coated on the substrate.

Claims 11-13 are allowed by virtue of their dependency on claim 10.

With respect to the independent claim 14, the prior art fails to disclose or make obvious a superconducting nano-channel formed by a plurality of nano-scale superconducting rods disposed around a central region.

Claims 15-18 are allowed by virtue of their dependency on claim 14.

With respect to the independent claim 19, the prior art fails to disclose or make obvious a nano-channel comprising two sections of semiconductor material disposed parallel to the central axis of the nano-channel and separated by two splits

Claims 20-24 are allowed by virtue of their dependency on claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"

***Relevant Prior Art***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Matsuzawa et al. ("High T<sub>c</sub> bulk superconductor wigglers", Applied Physics Letters, Volume 59, Number 2, 8 Jul. 1991, 141-142) discuss use of superconducting channels for deflecting electron beams in wigglers (undulators).

Matsuzawa (JP 401033836) discusses use of superconducting lenses to focus electron beams.
